TURMOGREASE NM 2 is a multipurpose grease for manifold applications in the temperature range of -30°C to + 160°C. Loss lubrication to 180°C.

Because of its excellent pumpability also at low temperatures it can be used especially for central lubrication systems.

Special properties

- Resistant to cold/hot water
- High load carrying capacity
- Excellent wear protection
- Very good corrosion protection
- Conveyable in central-lubrication systems
