

AGIP GREASE NF

AGIP GREASE NF is a non-melting grease formulated from a special thickener in a form of a gelling substance which gives a light-brown, smooth-textured product.

CHARACTERISTICS (TYPICAL FIGURES)

AGIP GREASE NF

NLGI consistency		1	2
Worked penetration	dmm	317	260
Dropping point	°C	infusible	infusible
Base oil viscosity at 40°C	mm ² /s	610	450

PROPERTIES AND PERFORMANCE

- AGIP GREASE NF is suitable for the lubrication of plain bearings and of ball and roller bearings operating at exceptionally high temperatures, which other types of grease cannot withstand.
- Being non-fibrous, it is also suitable for the lubrication of high-speed bearings.
